

ONLINE TRAINING

THE BENEFITS OF CLASSROOM LEARNING, WITH THE CONVENIENCE OF WEB-BASED TRAINING

TAKE ADVANTAGE OF THE FLEXIBILITY OF A VIRTUAL CLASSROOM

BENEFITS OF INSTRUCTOR-LED ONLINE TRAINING

This flexible and cost-effective format has been designed to suit your training needs and your organization's budget while offering you the opportunity to develop your professional knowledge and skills:

- Avoid travel time and expenses – simply complete the training from any computer with Internet access
- Interact with a live instructor and ask questions using Voice Over IP (VOIP)
- Learn via hands-on labs that reinforce training concepts
- Gain scheduling flexibility by choosing from a selection of course dates
- Immerse yourself in an actual classroom experience and benefit from real-time training interactivity without leaving your office
- Achieve the same results that you expect from an instructor-led classroom course without the high cost of travel and lodging

Presagis now offers many of our traditional classroom-based courses live, online in a web-based, instructor-led training format. The multi-day courses are delivered in eight 2-hour segments over 2 weeks to create a learning process that not only saves you money, but also immerses you in a dynamic environment where you can access and participate in an actual online classroom.

Online courses are hands-on so you can experience all of the same benefits of in-classroom training right from the comfort of your desktop! Participants interact with both the instructor and their class peers—just as if they were in a classroom—as they master the essential knowledge and skills needed to optimize your organization's use of Presagis software tools.

PUBLIC OR PRIVATE CLASSES CAN MEET YOUR UNIQUE NEEDS

Presagis offers online training either in public courses that you can register to attend on our web site; or, for cases when teams are geographically dispersed, we also encourage organizations to schedule private online training sessions to meet their needs. This can be a very cost-effective approach as it minimizes travel time and associated training costs related to teams that sit in multiple locations.

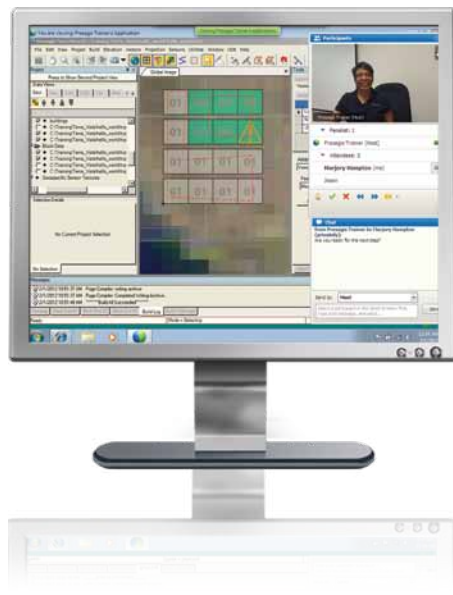

HOW ONLINE, INSTRUCTOR-LED TRAINING WORKS

Presagis offers you our high quality product training in a convenient online format to suit your schedule, development goals, and budget. Instructor-led online courses offer you a virtual classroom complete with fellow students, instructor guidance and feedback, and a comprehensive Presagis product training curriculum.

Courses are taught by a live instructor on a specific day and time. Most courses are equivalent to their classroom counterpart, including the course content and material, but they have been adapted to optimize training in a web-based environment:

- Course materials are delivered in advance,
- Course schedule has been adapted to optimize online learning,
- Participating students need an Internet connection to connect to a virtual classroom where they can interact directly with the instructor and their peers.

ONLINE TRAINING TECHNICAL REQUIREMENTS

In order to take Online Instructor-Led Courses, you don't have to have the Presagis software installed on your desktop – fully-functional training machines can be remotely accessed by participants and are allocated to them for the duration of the course. The only requirements for participants include the following minimum technical specifications:

- High-speed internet connection
- Headset or speakers to hear the instructor
- Optional:
 - A microphone to speak and be heard;
 - A web camera to be seen by the instructor;
 - A second monitor to ease the training experience

COURSE FEATURES	COURSE BENEFITS
Course materials	Provide in-depth coverage of the subject matter
Instructor & peer interaction in the online classroom	Maximizes your learning experience through collaborative online exercises
Experienced online instructors with Presagis product expertise	Provide feedback on assignments and application context for features being demonstrated
Exercises	Provide a hands-on training experience that tests your learning and maximizes comprehension
Online schedule	Ensures successful online learning while also offering flexibility that enables you to keep up to date with your in-office work
